Because all the color we print comes in green...

Here are just some of the many ways we're doing our part to help the environment.

Graphic services: We offer online electronic proofs to reduce paper waste and a PDF workflow to reduce production time.

Plating: We use chemistry-free plate processing. Our state-of-the-art equipment operates using as little power as possible.

Inks: We only use soy-based inks, which have lower levels of VOCs than traditional petroleum inks.

Printing: We use low-VOC chemicals. We offer a wide selection of sustainable and recycled paper. We coat your printing with non-toxic water-based aqueous coating which improves biodegradability of your coated products.

Binding and finishing: We recycle all unused paper scraps, printing plates, and ink waste.

Packaging: Boxes are custom-fit to projects to reduce waste. Multiple deliveries are combined to reduce vehicle emissions.
